# About Us

We, EX corporation, are an IT company based in Osaka city, Japan. Since establishment in 1994, we have been committed to contributing to the Manufacturing Industry by offering manufacturing management software solutions and other services related to manufacturing and production. Over more than 20 years, we have acquired and honed expertise and know-how through our success stories and challenges, which allowed us to be an IT company whose main product is currently one of the leaders in Japan's manufacturing management software market with more than 1650 implementation cases. In recent years, we have also been putting substantial effort into the promotion of Digital Transformation in Japan, focused mainly on Manufacturing and other related industries. And now, armed with expertise, knowledge and know-how acquired in the domestic market and overseas market, mainly in Southeast Asia, we are ready to offer our solutions and services all over the world.

President  
Atsushi Kakae

EXcorp. Osaka Head Office

# Integration with EXtelligence EDIFAS

Integrate Factory-ONE with EDIFAS, which is also one of the services offered by EX, and build supply-chain management system with EDI functions at low cost and in a short time.

EXtelligence  
EDIFAS

EXtelligence  
EDIFAS

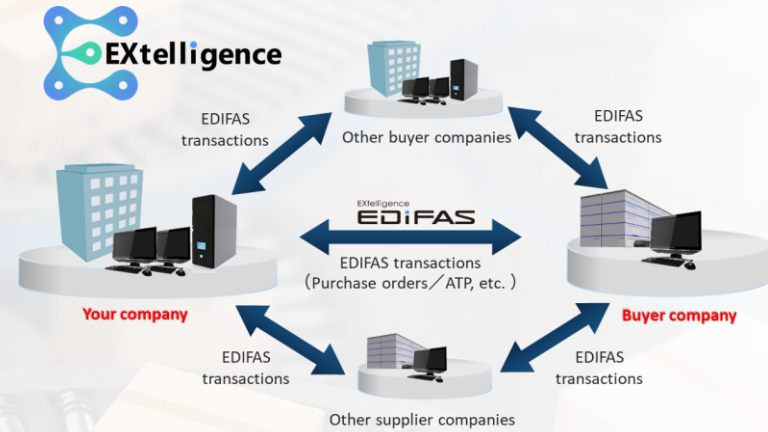

EDIFAS is a cloud-based EDI (Electronic Data Interchange) service that allows you to build a supply chain system. It is one of the services provided within the intellectual platform "EXtelligence" with the main focus placed on SCM (Supply Chain Management), B2B, IoT, etc. Not only companies that have implemented our manufacturing management system Factory-ONE, but companies that are using ERP and similar systems of other companies and companies that have not implemented any system yet can use EDI functions of EDIFAS such as quotation, ordering, shipping, etc. through simple CSV and API integrations (optional). Being a service with a simple, user-friendly interface and operated on the web browser, it eliminates downloading, installation and other time-consuming procedures and is designed to ensure a great customer experience.

## Factory-ONE and EDIFAS integration will also allow you to:

- Seamlessly integrate data such as production plan, receiving and shipping, sales and purchase orders, quotations, etc.
- Eliminate paper based procedures and improve labor productivity.
- Further promote Digital Transformation in your company.
- Suppliers can also use EDIFAS through CSV integration as well as API function.
- And much more!

Start with the 2-month trial version which is absolutely free and switch easily to the full paid version without any long procedures or settings.

We have also prepared EDIFAS FREE version which only includes Sales Order, Sales Order Reply and Billing Import functions and you don't have to pay anything for using it.

EDIFAS is a service with monthly payment and you can start using it right after your signed for it as well as cancel your subscription at any time.
